HEALTHY PLAY

Our customers are often our neighbors, and we all want them to be healthy in their play – and their communities. Our retailers play an important role, both as a representative for Atlantic Lottery and as the connection between Atlantic Lottery and our players.

At the heart of Atlantic Lottery lies our commitment to sustainable and responsible growth. By fostering a culture of healthy play, we not only enrich the experience for our players but also ensure our long-term viability.

Healthy play is about sharing information and tools for customers to enjoy the games. People who have harms or negative experiences with the games are not having a good time. Promoting sustainable gambling is good customer service and customer care. It involves providing customers with the best possible information and ensuring easy access to a variety of healthy play tools. It also means adhering to a few very important rules, such as not allowing gambling on credit, enforcing Atlantic Lottery's Play Policy by checking IDs to be sure customers are age of majority, and informing customers about where they can get help if they need it.

Together, our role is to create a gambling environment that supports customers in making informed decisions about their play. A gambling industry that puts customers well-being and entertainment first is more likely to be a sustainable industry, and that's healthy for everyone.

KEY MESSAGES FOR TICKET LOTTERY RETAILER STAFF

WHAT IS HEALTHY PLAY?

Healthy play is about promoting playing in the spirit of fun and entertainment. The best way for customers to keep gambling fun is to have the right information at hand when they play. Having the wrong information - such as believing the chances of winning are better than they are, or that someone is due for a big win - can lead a player to take risks.

Promoting healthy play means sharing information so customers can:

- Understand how the games work and the odds of winning
- Gamble for entertainment
- Know that gambling is a game – not a way to make money
- Know the facts, so you can share helpful information about gambling myths
- Be aware of the signs of potential gambling concerns
- Know about the support options if a customer has concerns about their play.

→ COMMON GAMBLING MYTHS

Providing helpful healthy play information is the most important goal of our healthy play program. There are a lot of common gambling misconceptions that you may encounter and need to respond to with true information:

- the outcome of the game is always random; it can never be predicted or guaranteed, no one can control who wins or loses,
- no tricks can increase the odds of winning,
- the odds are always against the player,
- in the long run, players will always lose more than they win.

These are the types of facts customers need to know to make informed decisions about their play. Here are a few examples of myths and the facts:

- ⇒ **MYTH:** I have a better chance of winning if I choose my numbers.
- ⇒ **FACT:** With ticket lottery games, you either choose your own numbers or accept randomly generated “Insta Pik” numbers. It’s important to know that your odds are the same either way. That doesn’t mean you can’t play your favorites, which is fun, as long as you know they have the same chance as any other combination.
- ⇒ **MYTH:** Lottery employees and retailers know which tickets are winners.
- ⇒ **FACT:** Lottery tickets and draws are based on random chance only. No one can predict when or where the next big win will happen, including lottery employees or our retailers.
- ⇒ **MYTH:** I almost won. I must be closer to a win the next time I play.
- ⇒ **FACT:** When your number appears to be close to the winning numbers, it’s called a “near miss” or “near win.” Although you might feel that you’re getting closer to a jackpot, it’s not true.

You are encouraged to use good customer service to share true information when responding to these myths. If a player believes a myth about gambling, be friendly and know the facts. Share the facts so customers know we care about keeping their play entertaining.

Here are some general concepts to use when talking to a player about how gambling works.

Randomness

When the outcome of a game is random, it means that it is determined by chance and nothing else. The outcome is uncertain and therefore unpredictable. There is nothing a player can do to increase their chances of winning.

Odds of Winning

The chances of winning any prize vary from one ticket lottery game to another. In any case, you are more likely to lose than win.

When talking to a player who has false beliefs about gambling, it is important that you DO NOT:

- “Go along” with the player who is saying inaccurate things about gambling because this indirectly confirms or encourages their false beliefs.
- Encourage the player to continue playing, playing longer, or betting more in hopes that their “luck will come around”. This could encourage their false beliefs.
- Try to argue or convince customers that their beliefs are false if they are unwilling to accept the information.

Never assume that everyone who gambles a lot or spends a lot of money gambling has concerns. People who have concerns with their gambling may show a variety of signs when they buy lottery products or are in your store. Some people can be harmed by playing what seem like very small amounts. It is not your role to diagnose people, but to share the facts and know about the resources for help.

→ SIGNS THERE MAY BE CONCERNS

- A customer approaches you for help with their gambling.
- A person makes an indirect comment such as “I have spent way too much money on these tickets”, or “Please don’t sell me any more of these tickets”.
- A friend/family member tells you they are worried about a customer’s gambling.
- You notice major changes in a regulars’ gambling or mood.

→ PLAYWISE MATERIALS

PlayWise materials are available at all ticket lottery retail locations and designed to help people make informed decisions and choose their own level of play with the goal of promoting healthy play.

Atlantic Lottery’s retailer policies are clear – retailers must display healthy play materials in plain sight – including point of sale displays. The PlayWise and healthy play information is available to inform customers, and the success of the healthy play program requires that we all play our part. Retailers and retailer staff have a role in customer care to ensure customers have access to healthy play information

Please reach out to your Lottery Representative if you require additional PlayWise materials.

→ MINIMUM AGE REQUIREMENTS

Like most lottery organizations around the world, Atlantic Lottery has implemented age restrictions on the purchase, play and redemption of lottery tickets. All lottery products, including scratch tickets, Proline, Breakopen and jackpot draws fall under Atlantic Lottery's Play Policy.

- Atlantic Lottery's retailer policies state that retailers and their employees must not sell lottery tickets to or validate tickets or pay prizes for lottery tickets presented by anyone younger than nineteen (19) years of age.
- This policy is supported by legislation in Nova Scotia and Prince Edward Island where it is against the law to sell lottery tickets to anyone under the age of 19.
- If a customer looks younger than thirty (30) years of age, retailers and retail employees must request picture ID from the customer to confirm that he/she meets the minimum age requirement of 19 years prior to selling, validating or paying prizes for lottery tickets.
- Atlantic Lottery has provided all retailers with 19+ signage that must be visible to the customer.

Atlantic Lottery monitors retailer compliance with these policies. Failure to comply may result in corrective action including fees or termination of the lottery ticket retailer agreement. Retailers must ensure they and all their employees know, understand and fully comply with this policy. Retailer owners and managers are responsible and accountable for the conduct of their employees.

→ REQUESTING ID: Customers who look 30 or younger

It is the responsibility of all retailers to request ID from customers who appear to be under the age of 30 and it is expected that retail owners and managers will encourage and support this practice.

- Only picture ID, clearly stating birth date, is to be accepted as proof of age.
- If you are not satisfied with the ID offered by the customer, request a second piece of identification such as birth certificate or health card. Ask them for their address or date of birth or have them write their name to compare it to the identification.
- Retail clerks who feel their underage peers will pressure them to sell lottery products are advised to ask their manager or another colleague to serve their peers. Should a situation arise where you as the clerk feel uncomfortable serving a friend or peer, this may be a good time to ask a more senior co-worker or manager to complete the transaction for you.

→ SAY 'NO' TO THE SALE

Customers who do not have proof of age, or refuse to show ID must be refused the sale, validation, or redemption of lottery products.

- Be professional and courteous.
- Tell the customer it is Atlantic Lottery's Play Policy and the law: that it is not within the retailer's control.
- Refer the customer to Atlantic Lottery's minimum age requirement signage posted in your store.
- Request assistance from a co-worker or supervisor if needed.

If a customer becomes angry - remain calm, professional and courteous. Rely on a co-worker or supervisor for support. Never put yourself at risk; contact authorities if necessary.

→ YOUTH GAMBLING

Research consistently shows that young people are at greater risk for developing gambling harms than adults. This is because the decision-making part of the human brain is still developing in youth. Some facts:

- Lottery products can be a pathway into gambling for young people.
- Adults affected by gambling concerns report early experiences with gambling, often starting between the ages of 10 and 19.
- Young people may be more likely to gamble to escape their problems, relieve boredom and/or feelings of depression.
- Young people with gambling concerns have been shown to have increased thoughts of suicide and suicide attempts.
- Youth gambling can negatively impact family and peer relationships, contribute to problems with education or jobs.

Anyone selling Atlantic Lottery products must be aware of the rules and regulations that apply to the sale of lottery products to ensure any risk of harm caused by gambling is reduced.

PARENTS & YOUTH

It's Atlantic Lottery's Play Policy, and law in Nova Scotia and Prince Edward Island, that people must be 19+ to purchase, play or redeem any lottery products. Even if parents are willing for their children to play, we cannot allow anyone under 19 to play lottery products.

Knowing that parents may not know why children are not allowed to play is important. Gambling is an age-gated activity because children do not have the same risk assessment skills as adults. Gambling at a young age can dramatically increase the potential for gambling harms later in life. It is important to remember that sharing the reasons why children cannot play should be offered kindly and without judgment. Our goal is to help parents make more informed decisions about how their children interact with lottery products.

TIPS FOR PARENTS AND CAREGIVERS

Here are a few tips for parents and caregivers to help prevent youth gambling from becoming a risk and concern:

- Learn the facts about gambling and age restrictions
- Encourage discussions and questions about gambling
- Be aware of your own gambling behaviours
- Never buy gambling products for minors
- Know what your kids are doing online and enforce clear rules about which online games they can play – even some video games include gambling

HELP AND INFORMATION FOR GAMBLING CONCERNS

The best thing you can do is offer information on local resources. At the very least you can give the player the Gambling Support Line. Confidential, free provincial helplines are available 24-hours-a-day, 7-days-a-week for people experiencing concerns with their gambling activities.

⇒ New Brunswick: **1-800-461-1234**

⇒ Newfoundland and Labrador: **811**

⇒ Prince Edward Island: **1-855-255-4255**

⇒ Nova Scotia: **1-888-429-8167** (Mental Health and Addictions Crisis Line)

The support line number can also be found on the PlayWise pamphlets available in the ticket selection slots at ticket lottery retail locations.

In general, when talking with a customer who is having issues related to their gambling, here are some things to remember:

- Don't use the term "problem gambling" or "responsible gambling": these can be felt as stigma words.
- Don't ignore comments or "jokes" someone makes hinting they have a problem or knows someone who has a problem.
- Don't expect someone to "admit" they have a problem.
- Don't try to convince the customer to see your point of view or why they should seek help.
- Do remember you are not a counsellor. Offer customer service, ask if you can provide them with information or a pamphlet. Never argue or counsel someone.

It is important to remember that speaking to a player about their gambling can be a sensitive situation.

Remember to:

- Respect the player's privacy (don't have discussions in front of others)
- Be considerate and discreet
- Show them that you care
- Tell them about PlayWise resources – they are for people with questions or concerns about gambling
- Don't ignore the issue

STAFF PLAY

Retailers may be at a greater risk of developing concerns related to their play due to their exposure to gambling products and promotions.

Atlantic Lottery encourages all age of majority retailers who play, to be aware of the extra risks and to take precautions to gamble sustainably. This can include setting a budget and time limits, or using the information or services found in the PlayWise materials. These are good for everyone with questions or concerns about their play; not only for people who think they have a problem.

RETAILER HEALTHY PLAY TRAINING

This training is mandatory, but it is also the right thing to do. The Retailer Healthy Play training program provides more tools and strategies for handling challenging situations with your customers. It can help you feel more confident when interacting about customers' questions or concerns around lottery products and risk and can help guide your customer interactions toward healthy play. Completing this training is a vital step to ensuring we support our communities, while offering lottery products in a sustainable and fun manner.

Please know that we value our retailers as much as we value our players. By completing the training, you are doing your part in providing sustainable and regulated lottery to Atlantic Canadians.

We also strongly recommend that your staff members complete the training as well.

SELLING LOTTERY

To get started, here's a very important reminder about selling Lottery.

Players must have reached the age of 19 to purchase, play, or redeem lottery tickets.

You must ask for identification if the player looks younger than 30 years of age to confirm they meet the minimum age requirement.

GROUP PLAY

GROUP PLAY

If a player is looking to buy tickets with multiple people, select **[GROUP PLAY]** in the Shopping Basket. This brands the ticket with a stamp indicating it was purchased with and for multiple people. Once selected, select the game icon to continue with purchasing a ticket.

This is an added precaution so if this ticket were to be a winner, one person could not claim the entire winning amount because it was stamped as a group play purchase with multiple winners.

NOTE: Once Group Play is activated, it will apply to all items in the same transaction. You will have to select **[Checkout]** to remove the **Group Play** stamp.

RETAILER PLAY

RETAILER PLAY

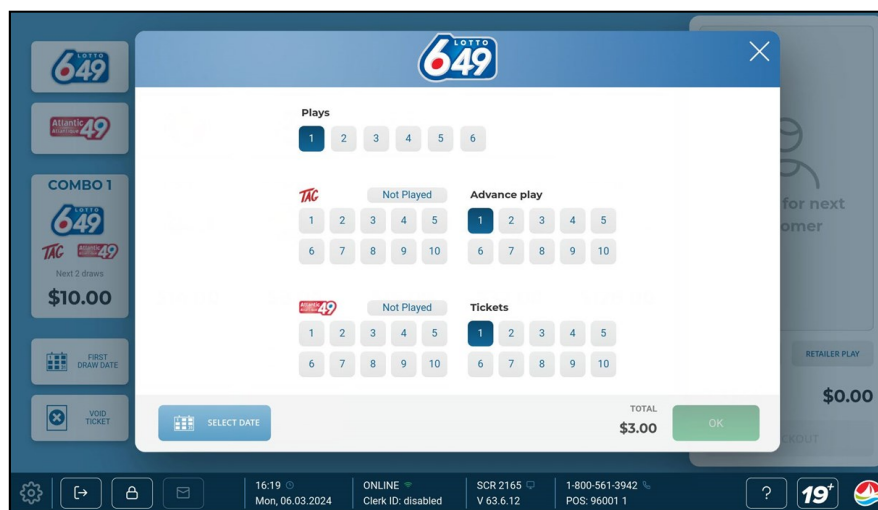

If a retailer is looking to buy tickets, select **[RETAILER PLAY]** in the Shopping Basket. This brands the ticket with a stamp indicating it was a ticket purchased by the retailer. Once selected, select the game icon to continue with purchasing a ticket.
